

Intelligent Pressure Transmitter

For food / bio / pharmaceutical industries

Field housing stainless steel 304 (1.4301)

Pressure ranges 0 – 400 mbar to 0 – 40 bar, accuracy $\leq \pm 0.1\% \text{ FSO}$

HART
COMMUNICATION PROTOCOL

SIL 2

PTFi

Application

The pressure transmitter PTFi is suitable for precisely measuring and monitoring vacuum, absolute pressures and positive pressures of liquid as well as gaseous media for pressure ranges from 0 – 400 mbar to 0 – 40 bar.

Available as process connections are hygienic connections such as clamp (standard), dairy pipe or thread connections (optional) with a flush-welded stainless steel membrane, which can be combined with a cooling extension for medium temperatures up to +300 °C, if necessary.

The robust stainless steel field housing has a high degree of protection IP67 as well as all properties for residue-free and antibacterial cleaning.

The pressure transmitter supports communication via HART® protocol. A turn-down span to 1:10 is available.

A version with safety functions according to SIL2 is optionally available.
