Diesel Exhaust Thermometer, Rigid Mount
Crimped-on ring case stainless steel

Diesel exhaust thermometers are primarily used for the measurement of exhaust and cooling water temperatures at diesel engines. They are specially designed for these high mechanical and technical loads, among others due to the “stem in jacket version” and the standard case filling with highly viscous silicone oil. To increase their durability, diesel exhaust thermometers should always be applied in combination with a thermowell.

### Standard Versions

This data sheet contains detailed information on our standard versions and available options. In overview 8000 you will find additional information on selection, metrological features, permissible ambient and storage temperatures as well as error limits, etc. Information on the metrologically optimal design of thermometers can be found in our technical information sheet T08-000-031.

#### Measuring Unit
With nitrogen filling (inert gas, physiologically safe)

#### Accuracy (DIN EN 13 190)
Class 1

#### Case
With polished crimped-on ring, stainless steel 1.4301 (304)

#### Degree of Protection (DIN EN 60 529/IEC 529)
IP65

#### Case Filling
Silicone oil

#### Nominal Case Sizes
63, 80, 100 mm (2 1⁄2, 3, 4”)

#### Case Configuration
Connection temperature sensor (stem):
- rigid mount with neck tube
- vertical bottom position
- centre back position (rm)

#### Temperature Ranges
- 0 – 120 °C
- 50 – 650 °C

#### Temperature Sensor (Stem)
Made of stainless steel 1.4571 (316Ti)
Max. static operating pressure: 25 bar
Stem models (jacket version): A5.5, A1.5 or A3.5
Stem Ø dF: 10, 12 or 13 mm
Stem length (standard): 150, 200, 250, 300 or 400 mm
Lmin = 150 mm
Compression fitting for stem model A5.5: galvanised steel

#### Window
Instrument glass

#### Movement
Brass/German silver

#### Dial
- 0 – 120 °C: aluminum white, scale black
- 50 – 650 °C: aluminum natural finish, scale black

#### Pointer
Aluminum black

#### Indication Adjustment (±6 %)
Externally via screw

#### Ordering Information, Standard Ranges, Options
See page 4

#### Special Versions and Further Options
- Other stem lengths and connection threads upon request
- Version for particularly extreme loads
- Other temperature ranges and/or special scales, e.g. dual scale °C/°F, coloured fields or ranges, dial inscriptions
- Case parts stainless steel 1.4404 (316L) upon request
- Position of connection radial at 3 o'clock, 9 o'clock, 12 o'clock, others upon request or other than vertical installation (90°)
- GOST version for Russia, Ukraine, Kazakhstan, Belarus

#### Thermowells
See data sheets 8.8110ff.

<tr>
<td>A3.5</td>
<td>80</td>
</tr>
<tr>
<td>A5.5</td>
<td>80</td>
</tr>
<tr>
<td>others</td>
<td>upon request</td>
</tr>
</tbody>
</table>

The minimum length Lmin is the smallest feasible stem length. Important: Please note the technical information sheet T08-000-031 on the metrologically optimal stem length.

The active length La is the temperature-sensitive part of the stem.
