

Something for Individualists ...

Thermometer TRCh 100 for indoor and outdoor use

The slightly different merchandising product

Are you looking for a valuable promotional item?
How about a thermometer with individual design?

As an extension to our industrial ambient thermometers, we now also offer the TRCh 100 for the private use. The instrument with high-quality stainless steel case is weatherproof and reliably indicates the temperature both indoors and outdoors.

Due to the latest technology, we are able to design your customised thermometer. We can implement individual dials with your colour requests, also combined with your text elements.
