

### Application:

In the field of gas technique very high demands are made to the density of the tubing, especially for critical gases. Such systems are often piped with high-quality clamping ring fittings. To avoid additional connections, we offer pressure gauges with tube sockets for the known screw fitting manufacturers.

Further details regarding pressure gauge models RCh 63-3 and RSCh 63-3 can be found in the particular data sheet 1211, resp. 1611.

### Technical Data

#### Accuracy (EN 837-1)

Class 1.6

#### Nominal case size

NCS 63 (mm) (2½")

#### Wetted parts

316L stainless steel

#### Pressure ranges (EN 837-1)

0-0.6 bar to 0-600 bar

#### Process connection

6 mm or ¼" external tube diameter

#### Case

with bayonet ring case, 1.4301 (316 stainless steel)

#### Safety category according to EN 837-1

see data sheet

#### Options

- upon request we also deliver instruments including clamping ring and union nut
- other external tube diameter upon request

Sales and Export South, West, North

**ARMATURENBAU GmbH**

Manometerstraße 5 • D-46487 Wesel - Ginderich
